Proposed Amendment of Class E Airspace; Cut Bank, MT

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) Part 71 by modifying Class E surface area airspace and Class E airspace extending upward from 700/1,200 feet above the surface at Cut Bank Municipal Airport, Cut Bank,

MT. Controlled airspace is necessary to accommodate aircraft using the new RNAV (GPS) standard instrument approach procedures at the airport. The Class E surface area airspace extending from the 4.7-mile radius of the airport would extend from the airport bearing to 11 miles southeast of the airport; the Class E airspace extending upward from 700 feet above the surface within the 7.9-mile radius of the airport would have segments extending from the airport bearing south and southeast of the airport, and within a sector extending upward from 1,200 feet above the surface. Also, the geographic coordinates of the airport would be updated to coincide with the FAA's aeronautical database for the respective Class E airspace areas. This action would enhance the safety and management of aircraft operations at the airport.

Class E airspace designations are published in paragraphs 6002 and 6005, respectively, of FAA Order 7400.9W, dated August 8, 2012, and effective September 15, 2012, which is incorporated by reference in 14 CFR Part 71.1. The Class E airspace designation listed in this document will be published subsequently in this Order.

The FAA has determined this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation; (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified this proposed rule, when promulgated, would not have a significant economic

impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106, describes the authority for the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This proposed regulation is within the scope of that authority as it would modify controlled airspace at Cut Bank Municipal Airport, Cut Bank, MT.

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.
